

# Milestone

*Starring:*

**PLANT  
IN A STEEL  
MILL**

Anno 1991

**SERVICE  
TECHNICIAN  
TOBI**

Anno 1991

**That is  
just as old  
as me!**

*What has happened:*

The plant cools a driver's cab and electrical equipment on an overhead crane under really harsh conditions. There are temperatures of up to 80°C and heavy dusts. The plant has to withstand shocks and vibrations again and again. And it has been doing so since 1991 ...

... and it will  
continue doing so.

**Thanks  
to Tobi!**
